

MY CRAZY BICYCLE

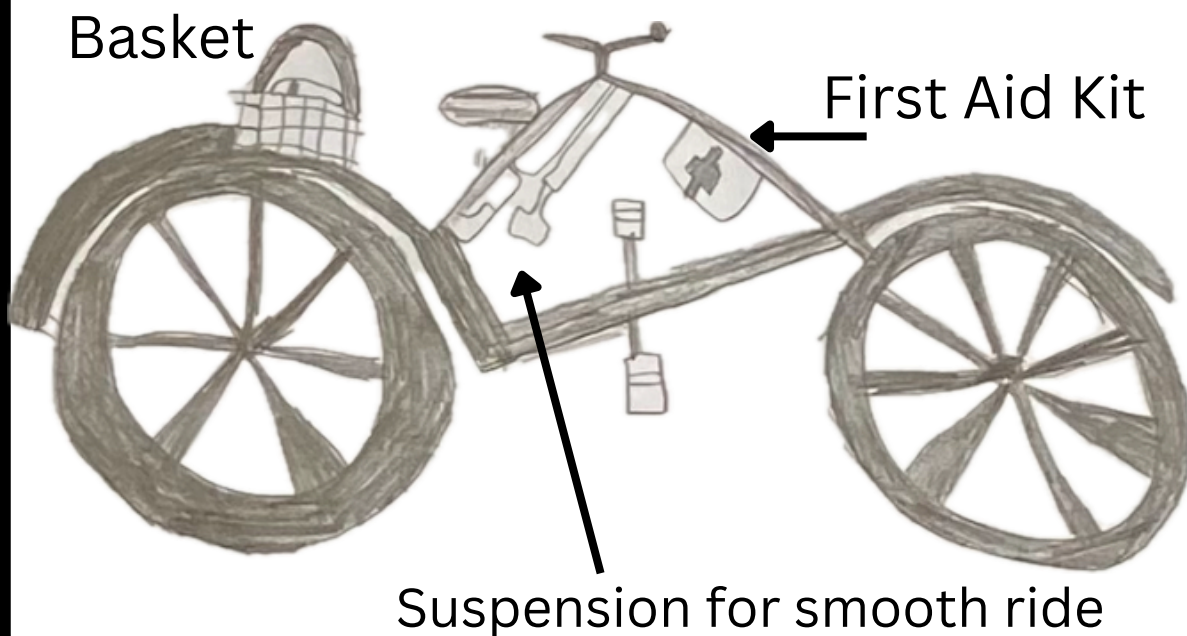

Create your own special bike, perhaps by combining parts from different bikes you see on display here.

Things to consider

- How many wheels will your bike have?
- Where will it be suitable to ride?
- Does it have any additions like a water bottle holder, or place to put your first aid kit?
- Don't forget to design a helmet to wear!
- Does it move by peddling or does it have a motor?
- Will it need a light?
