

Station 1 – Pilot Ladder

A pilot ladder is used to get on and off ships when at sea. You can see one on the wall next to you.

A pirate needs a ladder to get on and off ships when at sea.

Make a model pilot ladder with the Marlinspike Hitch using the rope and sticks.

IMPORTANT – It may take a few attempts to learn how to do it. That's ok, you can take as long as you need. You get to decide when you move to the next station.

Remember to take your ladder apart when you finish so no other pirates follow you.
